#### **DETAILED ACTION**

### Response to Arguments

1. Applicant's arguments filed 3/19/2007 have been fully considered.

Applicant's arguments regarding claim 19 are persuasive. See ¶2.

Applicant's arguments regarding claim 21 are not persuasive. Applicant argues Itoh does not disclose, a conveyor with a transverse drive system that is operable to accumulate articles on the rollers of the tandem zones in response to article sensors, or a roller conveyor with two tandem zones, each of the at least two tandem zones comprising a plurality of idler rollers mounted to the sidewalls of the roller conveyor, or that each zone of the roller conveyor has a transverse drive system that is independently operable to rotatably drive at least some of the plurality of rollers of the respective ones of the at least two tandem zones.

In response, the Examiner disagrees. Itoh discloses a transverse drive system that is operable to accumulate articles on the rollers of the tandem zones in response to article sensors in C1/L30-38, figure 18 shows at least two tandem zones, the idler rollers (73) are mounted to the sidewalls by way of the mount shown in figure 4, and each zone of the roller conveyor has a transverse drive system that is independently operable to rotatably drive at least some of the plurality of rollers of the respective ones of the at least two tandem zones as shown in at least figures 6 and 18, as shown in the Action filed 12/19/2006 in ¶4.

Art Unit: 3651

## Allowable Subject Matter

2. Claims 2-12,17-19,22-34,57-64 are allowed.

## Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claim 21 is rejected under 35 U.S.C. 102(e) as being anticipated by Itoh USP 6,763,927.

Itoh discloses a roller conveyor comprising:

- A pair of opposite sidewalls (fig.8)
- At least two tandem zones (fig.18), each comprising a plurality of idler rollers (73) mounted to said sidewalls (by way of the mount in fig.4), each tandem zone comprising an article sensor (C1/L30-38)
- A transverse drive system comprising a transverse drive unit at each of said at least two tandem zones, wherein each of said transverse drive units comprises a motorized roller (2) positioned generally transverse to said plurality of idler rollers and a plurality of drive members (83) connected between said motorized roller

Application/Control Number: 10/710,809

Art Unit: 3651

and at least some of said plurality of idler rollers, each said motorized roller having an internal motor (fig.4,6,8)

- Said motorized rollers being independently operable (one motorized roller is used for each set of idler rollers; see fig.6,8)
- A control being operable to activate and deactivate said internal motor (C17/L7-14)
- Wherein said idler rollers are positioned generally orthogonal to said sidewalls (the idler rollers face the sidewalls; fig.7,8)
- Wherein said motorized roller is positioned generally orthogonal to said idler rollers (fig.6)

#### Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3651

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leslie A. Nicholson III whose telephone number is 571-272-5487. The examiner can normally be reached on M-F, 8:30 AM - 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gene Crawford can be reached on 571-272-6911. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
